

I was in shock to learn the wisconsin Do Not Call list is in jeopardy. I work 3rd shift and have 2 children in school. I have to keep my phone on during the day for my job and in case of an emergency with my children. Anyone who knows me, does not call during the day. Before the State Do Not Call list, I was woken by telemarketers several times per week. Now, I cant remember the last call I got. why do you feel the citizen isnt entitled to restrict unwanted phone calls to their residence? Your home is one place you are entitled to peace and quiet.
